**Havit Hv-g69 Gamepad Driver !!TOP!!**

---

hi, i've had the same problem and i'm trying to solve it. i tried what you said, the most recent drivers, both off the site and off the logitech site. the hv-g69 is plug and play on my pc, so that shouldn't be the problem. in addition, the usb gamepad worked fine on my laptop as well as my desktop. i updated to win 10 and it stopped working on my desktop and my laptop. any help would be appreciated. i have a logitech gamepad g300. i believe i've tried all the solutions suggested in this thread so far. i've tried manually registering the device, and the usb gamepad in device manager. but no joy. i've tried the microsoft usb hid class gamepad driver, as suggested in this thread, and that also hasn't worked. i've tried uninstalling and reinstalling the driver, and that hasn't worked either. it worked fine on my laptop, but not on my desktop. any further suggestions would be appreciated. havit hv-g61 usb double gamepad1. classical gamepad design, simple and easy to control.2. free driver installation, make the games much easier3. usb plug, plug and play4. turbo, clear and auto function5. trip around the build-in vibration motor, vibration can provide a perfect and great performance6. 12 action keys help you play the games easily option 2: update game controller drivers automatically to install windows 10 game controller drivers, you can choose from our or for the driver that fits your specific game controller model and your pcs operating system. if you cannot find the right driver for your game controller, you can. we will find it for you. or, try the option instead. once you have downloaded the new driver, next remove the current game controller driver. windows 10 will now install the new game controller driver for you.
